Ways To Make Your Warehouse More Environmentally Friendly

Global warming and climate change are huge topics looming over our planet. Many businesses are looking for new ways to be more sustainable and environmentally friendly. Including recycling, changing lighting, and using electric warehouse vehicles. This is the same across the warehousing, transportation, and storage industry.

There are various benefits to making your warehouse environmentally friendly. From reducing utility bills, reducing the companies carbon footprint, and overall providing an eco-friendly business that staff can be proud of. Even making small changes can have a huge impact in the right direction to making your warehouse more environmentally friendly.

Electric Warehouse Vehicles from ePowerTrucks

Our range of electric warehouse vehicles can help your warehouse improve efficiency. Able to lift heavy items and therefore, move stock, equipment, and people with ease. We offer a range of vehicles from electric tow tractors, electric tugs, electric utility vehicles, and electric platform trucks.

Our portfolio of warehouse vehicles offer solutions adapted to narrow or wide aisles and intensive low or high-frequency tasks. Furthermore, they can be adapted to meet the unique needs of your company. With bespoke platforms, cage modifications, and accessories that speed up tasks or increase capacity. All of which are able to enhance performance, reduce risks and improve health and safety.

Every ePowerTrucks electric warehouse vehicle can reduce your carbon footprint. With clean, zero-emissions and long-lasting, heavy-duty components they get the job done. Made to the highest standards and with only a few moving and wearing parts, these warehouse vehicles require little maintenance, keeping operational budgets low and predictable. Therefore, investing is one stage closer to creating a more sustainable and environmentally friendly warehouse. Contact ePowerTrucks today to discuss your warehouse and warehouse truck needs.

Latest news

HMP Portland Invests In A Fleet Of Zero Emission Pedestrian Trucks

Dorset based HMP Portland has invested in 5 EP 500 electric platform trucks from ePowerTrucks.

The zero emission all-electric pedestrian trucks will be used by the on-site maintenance and housekeeping teams.

The EP 500 is a pedestrian-controlled electric platform truck that is perfect for indoor and outdoor use, it has great stability and can carry up to 1,000kg.

Previously the on-site teams have been moving waste & laundry manually, however now they can use the EP 500 to not only save time but also reducing the manual handling risk to the staff.

Latest news

Company stalwart retires

Former and current employees joined us to say goodbye to Dave Redfern. We had the obligatory Mexican food truck and some frosty beverages to see him off.

Dave has been with us at Epowertrucks/Lift Safe Ltd for 15 years. He was the "Guru" of after-sales for electric vehicles and materials handling equipment.

He was the go to guy for customers for technical advice over the phone as well as some of the younger engineers in the company.

Dave, from all of us, enjoy your well deserved retirement, your tour around Asia and spending time with your family. You will be missed!!

London based construction company reduces manual handling with Lift Safe

Lift Safe supplies a London based construction company with the perfect solution to safely handle boxes within their archive room.

Designed with a split level platform, the operators can easily slide boxes on and off the platform at floor level and, to heights above the height of the mast.

Prestigious Staffordshire School Invests In ePowerTrucks EP AMP XL

Prestigious Staffordshire School Invests In ePowerTrucks EP AMP XL

A large prestigious school in Staffordshire has switched to electric with the all-electric EP AMP XL.

The school maintenance team will be taking full advantage of the EP AMP XL as they can use the large flatbed for carrying up to 400kg of waste/tools, and with its range of up to 90 km, this plug-in electric vehicle was the perfect option for the on-site maintenance team.

ELECTRIC POWERED WHEELBARROW

Electro Barrow

The electric powered EP Electro Barrow mini-dumper is the ideal solution for a wide variety of tasks and applications. Ideal for domestic and commercial purposes, the electric barrow excels in construction, plant hire, landscaping, garden work, and maintenance.

You can take the EP Electro Barrow electric wheelbarrow through a home or building to access gardens with restricted outside access.

It does not create a noise disturbance, and with no exhaust or emissions, there are no foul smells to fill the house, office, factory, or outdoor space.

Dave Overall

AFTER SALES - TECHNICAL SUPPORT

As part of our busy after-sales team, Dave plays an integral role in supporting our customers' day-to-day requirements.

Dave joined us just over a year ago in early 2021 after running his own forklift instructor business. He also has over 20 years of experience as an engineer, completing his modern apprenticeship in a busy engineering plant.

Product spotlight

01M5 500KG COUNTERBALANCED CRANE

01M5 Counterbalanced Crane

The 01M5 mobile mini crane is part of our wide range of counterbalanced 360° swivel cranes, it has a maximum capacity up to 500 kg and outreach up to 1360 mm.

Our cranes offer long-term performance with a short-term return on investment thanks to their low maintenance costs and reduced downtime, compared to other lifting equipment.

The frame is made of painted steel and is equipped at the base with 2 useful forklift supports (to lift and transport the crane in complete safety on long distances).

The sturdy push handle can be disassembled. There are also 2 handles to easily rotate the ballast. Features include a rotating jib arm with 8 locking positions and a swivel hook for easy loading.
