How electric vehicles help reduce noise pollution

With the new UK government's 10-point green recovery plan, which commits to banning all newly bought petrol and diesel vehicles by 2030, it is safe to think that the future of motoring is going to be electric. This is all set to create a carbon neutral UK by 2050.

Air pollution is not the only pollution that having electric vehicles (EVs) will change. Noise pollution will also be reduced and the roads around us will be much quieter. Switching from the engine roars of petrol and diesel vehicles to the simple quiet whirl of EVs making a huge difference.

Health benefits of reduced noise pollution

The most common health problem noise pollution causes is Noise Induced Hearing Loss (NIHL). This is permanent and is a result of the sensitive structures within the inner ear being damaged. Several research studies have also found a correlation between noise pollution and increased anxiety, high blood pressure, heart disease, and strokes. One study found that people living in areas near a road were 25% more likely to suffer from depression.

EVs use electric motors that run silently, reducing noise pollution levels in cities and suburbs. Noise levels in urban areas can be reduced by up to 50% with EVs on the roads. This reduction in noise pollution is significant, as it improves the quality of life for people living in urban and suburban areas. EVs also eliminate the noise associated with engine starting and gear changes, further contributing to noise reduction.

Where to buy your electric vehicle

With over 20 years of experience, ePowerTrucks specialise nationwide in the sales, repair and service of road legal electric trucks, electric street vacuums, electric pedestrian tow tugs and a wide range of electric multi passenger vehicles. We are experts in providing specialist solutions for any application. Contact us today so we can work with you in providing you a solution for your electric vehicle needs.

Latest news

London depot open

ePowerTrucks, a leading provider of electric vehicles and sustainable transport solutions, has announced the opening of its new London depot. This state-of-the-art facility will serve as a central hub for ePowerTrucks' operations in the southern region of the UK.

The new depot will allow ePowerTrucks' customers to view and test drive the full range of the company's electric vehicles in one convenient location. From cargo vans to passenger buses, ePowerTrucks offers a diverse range of electric vehicles suitable for a wide range of applications.

In addition to providing a showroom for customers, the London depot will also serve as a base for ePowerTrucks' southern-based engineers. With a team of experienced technicians on site, the depot will be able to offer quick and efficient maintenance and repair services for all ePowerTrucks' electric vehicles.

"We're thrilled to be opening our new London depot," said Jerry Hanss, CEO of ePowerTrucks. "This new location will allow us to better serve our customers in the southern region of the UK by providing a one-stop-shop for all their electric vehicle needs. We're excited to showcase our full range of electric vehicles and to provide a convenient location for our customers to test drive them."

The opening of the London depot is part of ePowerTrucks' ongoing commitment to providing sustainable transport solutions that are environmentally friendly and cost-effective. With a focus on innovation and quality, ePowerTrucks is dedicated to helping businesses and organizations reduce their carbon footprint and increase their bottom line.

Latest news

Prestigious Oxford Flight Academy takes delivery of another EP AMP XL

The on-site maintenance team will be taking full advantage of the EP AMP XL's as they can use the large flatbed for carrying up to 400kg of waste/tools.

This was a re-conditioned unit which the workshop team have done a great job with.

Our range of electric utility vehicles are perfect for a wide range of campus applications.

Turkey-Syria Red Cross Bake Sale Raises over £300

Our company bake sale was a huge success, and we managed to raise over £300 for the Red Cross Earthquake appeal!

We're thrilled to have made a contribution to those affected by the recent earthquakes, and we couldn't have done it without all of our members of staff.

2 E-480 Electric Burden Carriers Supplied To Industrial Supplier

A Southern based cleaning equipment supplier has invested in 2 E-480 electric burden carriers for their clients.

The 2 electric burden carriers were supplied with a custom body which includes a rear cage with barn doors on the back.

With its advanced engineering and improved modular design, the MC-480 electric burden carrier takes productivity to new places. It boasts superior components throughout, including a high-efficiency AC powertrain and controller with multifunction display, direct drive differential, and larger drum brakes.

Meet the team

Bradley Whipday

WORKSHOP CONTROLLER

Meet Bradley Whipday, our dedicated and experienced Workshop Controller. With 15 years of experience in the industry, Bradley brings a wealth of knowledge and expertise to our team.

As Workshop Controller, Bradley is responsible for overseeing the day-to-day operations of our workshop, ensuring that everything runs smoothly and efficiently. He is a true leader, providing guidance and support to our team of in-house technicians, and working closely with our customers to ensure that their needs are met.

Outside of work, Bradley enjoys competitive kart racing and spending time with his young family.

We are lucky to have Bradley on our team. He is a true asset to our organisation and we are grateful for his hard work and dedication.

Product spotlight

Counterbalanced Crane

OMNIA 2T

The OMNIA 2T is equipped with a triple electric boom that reaches a free overhang of over 3 meters and a maximum capacity of 2,000 kg.

The OMNIA 2T heavy duty counterbalance crane is the ideal crane for lifting heavy and bulky loads and thanks to its extreme manoeuvrability it can reach any location where the load has to be picked up, including narrow aisles and tunnels.

This heavy duty counterbalance crane has an excellent steering angle that allows it to move along the narrow spaces or rotate on its axis in limited spaces. It is equipped with AGM batteries that can be recharged in areas with limited ventilation.

It can be equipped with any type of under hook accessory (vacuum lifter, bars, beams, clamps, mag lifts and customised solutions) for unlimited applications in a large variety of industries.
